

## INSTRUCTIONS ON USING THIS BOX

There are three layers of foam. Each is ½ inch thick. Remove the top layer of foam. You will see that there is a small piece of foam at each end of the box in the middle level. Place the slide on these two small pieces of foam. Draw a tight line around the left hand grip and around the crook with a small marker.

Remove the slide and the two small pieces. Cut out the shape of the left hand grip and the crook from these small pieces. It's better to make it fit too tight than too loose.

Place the slide on the lowest layer of foam and then place the two small pieces at the end. If the slide feels loose, and moves from side to side or end to end, cut some shims from the scrap foam removed. When the slide fits snugly, replace the top layer of foam. Be sure to include the forms inside the wooden box along with the slide. Repack the wooden box in the reusable cardboard sleeve between the two bricks of Styrofoam. The sleeve can be used over and over. We will replace it if it is damaged in shipment.

Be sure to include your name, address, phone number and email address. Any special instructions for return shipping should also be included. If you are on vacation, be sure to tell us, on the purple Admission Form, when you want the slide returned.

The cost of the setup is \$155.00. The cost of the box is \$25.00. It usually cost between \$20 and \$35 to ship the completed slide home, including insurance. An invoice will be emailed to you when the slide leaves the shop. We will accept payment by VISA/MASTERCARD/DISCOVER, check, or PayPal. You can call in credit card information or complete the enclosed Credit Card Authorization Form.
